FIG. 79 is a perspective view of the device in accordance with the present invention, showing the device in a closed position. The device is a rectangular box with a lid. The lid is hinged to the box and is shown in a closed position. The device is made of a material that is resistant to fire and is used for storing valuables. The device is shown in a perspective view, with the lid and the box being the main components. The lid is hinged to the box and is shown in a closed position. The device is made of a material that is resistant to fire and is used for storing valuables.
